An International Journal Designed for the Diverse Community of Users and Developers of Novel X-Ray Imaging and Analysis Techniques

New

Journal of X-Ray Science and Technology

Editor-in-Chief: **Larry Knight**
Brigham Young University, Provo, Utah

The historically difficult field of x-ray analysis is facing urgent new challenges (e.g., x-ray microlithography, x-ray astronomy). At the same time, new technologies arising from fields traditionally considered unrelated to x rays (semiconductor processing, accelerator technology, etc.) are presenting opportunities for new devices and the enhancement of traditional devices that can meet the new challenges as they arise. A short list of these developments would include: synchrotrons, x-ray lasers, x-ray image formation by charge-coupled devices, and parallel processing for image reconstruction. In addition, opportunities for novel applications of x rays are developing in many other areas such as materials science, analytical chemistry, plasma sciences, biology, medicine, and nondestructive testing.

Because of the dynamic nature of these developments, it is important that interested scientists and engineers have a single literature source that will provide clear and full coverage of new developments in the field. The **Journal of X-Ray Science and Technology** intends to meet this need by publishing reports of original research and timely reviews of the best technical and esthetic quality possible.

Volume 1 (1988), 2 issues **ISSN 0895-3996**
In the U.S.A. and Canada: $50.00 **All other countries: $56.00**

Manuscripts may be submitted in quadruplicate to:
JOURNAL OF X-RAY SCIENCE AND TECHNOLOGY
Editorial Office
1250 Sixth Avenue, San Diego, CA 92101

Sample copies and privileged personal rates are available upon request.

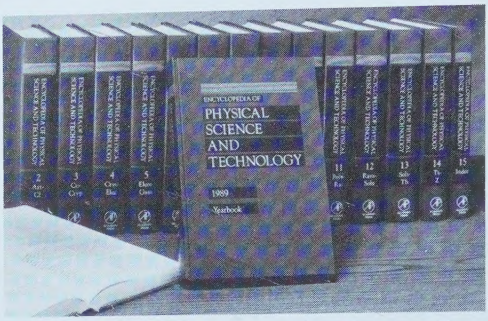
Encyclopedia of Physical Science and Technology



editor-in-chief
Robert A. Meyers
TRW Electronics and Defense Sector
Redondo Beach, California

Since its publication in April 1987, the **Encyclopedia of Physical Science and Technology** has become *the* contemporary reference in thousands of collections worldwide. A complete technical library, the **Encyclopedia** is . . .

DETAILED

Fifteen volumes including a 55,000-entry subject index • more than 550 original articles • 6,000 illustrations and 2,000 tables • 4,000 bibliography entries and 5,200 glossary entries.

COMPREHENSIVE

The **Encyclopedia** covers such major subjects as: Aeronautics • Astronomy and Astrophysics • Atmospheric Science and Aeronomy • Chemistry • Communications • Computers and Controls • Earth Sciences and Oceanography • Electronics and Electrical Engineering • Materials Science and Engineering • Mathematics • Mechanical, Industrial, and Civil Engineering • Military Sciences • Nuclear Technology • Physics.

1987, 15-volume set including index, $2,500.00

For more information or to order your set of the Encyclopedia, please contact your local bookseller or Academic Press, Book Marketing Department, 1250 Sixth Avenue, San Diego, California 92101-4311 (619) 699-6345.

ANNOUNCING THE 1989 ENCYCLOPEDIA YEARBOOK!

To keep your set of the **Encyclopedia** the most up-to-date reference source for years to come, Academic Press will be publishing Yearbook volumes. Each yearbook will feature several articles examining new, fast emerging areas of study or offering the latest information on topics already in the **Encyclopedia.**

For more information about the Yearbook, to reserve your copy, or to place a continuation order, please contact your local bookseller or Academic Press.
